(NEWBERRY."

Immediately on receiving the cablegram Acting Secretary Newberry carried it to the president at the White House and was authorized to send the foregoing expression of sympathy. He also communicated the sad news to Secretary Bonaparte at his home in Baltimore over the long distance telephone. Meanwhile, by direction of Admiral Converse, chief of the navigation bureau, Captain Potter, the assistant chief, and Commander Wilson were busily engaged in looking up the addresses of the relatives of the

Guantanamo, Cuba, April 14.—

The United Status battleship Kearsarge has arrived here. The casualities resulting from the exposed of Culebra island, Friday, are responsed to be as follows:

Troo officers and five men killed and fourteen men injured, eight of them seriously.

The bodies of the men killed will be broken to morrow.

Washirgton, April 14.—Two years ago to a day, a day later than the fatal Missouri disaster, as every sailor immediately recalled, on a Friday and the 13th of the forward turret of the battleship Kearsarge by one of those accidents which acquire additional terror for sailors because of their obscure origin and almost impossibility of prevention.

The Atlantic fleef had been cycleshis in the waters of the Caribbean sea, culminating in the quarterly target practice. This practice was just about concluding, with most salisfactory results up to yesterday, and it was confidently expected at the department, upon the basis of preliming the quarterly target practice. This practice was just about concluding, with most salisfactory results up to yesterday, and it was confidently expected at the department, upon the basis of preliming the department, upon the basis of preliming the callegram from Rear Admiral Evans, commanding the Affantic fleef, telling of the gunterly the consumption of some time to ship, the Kearsarge. The news came from Calmanera, a little cable station at the mouth of Guantanamo bay, indicating that the Kearsage itself had arrived at the mouth of Guantanamo bay, indicating that the Kearsage itself had arrived at the mouth of Guantanamo bay, indicating that the Kearsage itself had arrived at the mouth of Guantanamo bay, indicating that the Kearsage itself had arrived at the mouth of Guantanamo bay, indicating that the Kearsage itself had arrived at the mouth of Guantanamo bay, indicating that the Kearsage itself had arrived at the mouth of Guantanamo bay, indicating that the Kearsage itself had arrived at the mouth of Guantanamo bay, indicating that the consumption of some tim

a serious accident had occurred. When the message was finally reduced to form it read as follows: "Galamaera, April 14, 1965—Secretary and the serious of the second of the serious of the serious of the serious of a third and the serious of the sarge forward turrets, while the powder was going below, three secolous of a third harry of powder in other lift, just below and one section thritteen-inch remained in fact. Cause unknown. Matter is being investigated. Lieutenant Joseph M. Graenie, gun umpire, has been sent to about 9 p. m. The following have sincedied: List of Victims. "Lieutenant Higgins, turret officer, Peter Norberg, genmer's mate; Theodore Naegeley, segman; Anton O. Thorson, seaman, Julius E. Koster, turret captain Julius E. Koster, tu LARGE PROMISES, GREAT LOSS OF SMALL RESULTS LIFE IN FORMOSA

which is materially to limit the executive authority of the chief of staff, making him mainly an advisory officer. The order thus throws an added burden of responsibility on Assistant Secretary Oliver. In future the chief of staff is empowered only to issue orders in his own name to the general staff corps, otherwise he will issue them "by order of the secretary of war," through the military secretary.

KILLING EACH OTHER FOR THE LOVE OF GOD

warsaw, Russia, April 14.—The religious troubles between the Catholics and Maria-vits, the new Catholic sect. In many places in Poland are assuming a very serious phase. Indeed, the situation has almost reached the dignity of civil war. At Lupts 3,000 Mariavits attacked 2,000 Catholics and Maria-vits, the new Catholic sect. In many places in Poland are assuming a very serious phase. Indeed, the situation has almost reached the dignity of civil war. At Lupts 3,000 Mariavits attacked 2,000 Catholics and a regular pitched battle followed during which three men were killed and forty wounded. The fighting is proceeding today. At Lehno constant skirmishes are in progress and several persons have been killed or wounded. Last week at Chwartek the Mariavits, who are in the majority there, took possession of a church and insisted on the reappointment to it a priest who was dismissed by the train at a crossing.

CHIEF OF STAFF NOW A MERE FIGUREHEAD

Washington, April 14.—Secretary Tart, today issued an order, the effect of which is materially to limit the executive wait of which is materially to limit the executive wait of which is materially to limit the executive wait of the state of the same of the state of the

men at Chicago and Missouri river points on the ground that they are "members of a trust and are restraining trade." This move was decided on by the executive committee of the American National Livestock association and the other livestock organizations represented at the meeting held in this city today. Attorney Samuel H. Cowan of the American-National was instructed to investigate the alleged trust and institute suit. and institute suit.

and institute suit.

A committee consisting of Dr. J. M. Wilson of the National Wool Growers' association, Murdo MacKenzie of the American National Livestock association, and A. L. Ames of the Corn Belt Heat Producers' association, will go cast to make arrangements for the establishment of the independent commission houses, on which the stockmen will spend \$100,000.

Vesuvius Told by Director of Royal Observatory.

EXPERIENCE OF THE AMERICAN MUST EITHER GO TO WORK OF ASSISTANT.

Naples, April 14.-The Associated Press

ageously held his post throughout the eruptior. The noted scientist was found to be comparatively calm and undisturbed by his recent fearful experiences.

For three days Professor Matteucci and his little band were cut off from the outside world. Their provisions ran low and their rations consisted of cheese, bread and dried onions, until Professor Matteucci's urgent telegraphic appeals led a venturesome guide to push through on Friday with a stock of supplies for their relief. Meantime the professor had kept at his instruments, taking observations and making calculations day and night, while a perfect inferno raged around him.

Appearance of the Professor.

Appearance of the Professor.

As he came forward to greet the correspondent his blackened face and dust-covered clothes told of the ordeal through which he had passed. He is of medium height, stocky of build, with a ruddy face and silver gray hair and mustache. His appearance combines the intellectuality of the savant and the hardihood of the athlete. His rough garb seemed to belle his profession, for he looked like a western cowboy after a hard ride in a dust-storm.

half a dozen strikers stopped him. One man approached him, stared him in the face, and muttered a few words to his countrymen. Just at that point several persons came down the trail and the strikers dropped back under cover. They evidently held up the wrong man. Mahon said that they were armed and thought that he was one of the men marked by them.

Deputies Round Up Strikers.

Sheriff Emery and his deputies scoured the fields and vacant grounds in the neighborhood of the swelters.

side the observatory zone. There was no scoria in this discharge, but solid bullet-like stones, which cut the roof and damaged the windows."

Professor Matteucci employed his hands as well as his voice in order to deplot

as well as his voice in order to depict the continuous mass of stones rising like

This was just before the rain of huge stones of the household removed. This was just before the rain of huge stones began, and I was then left with Professor Perret of New York, my American assistant, and two domestics. There was scarcely any eating, and all domestic order was abandoned. We sent out from the headquarters of the Western Federation of Miners in this city to local unions urging a large at-

Veritable Hell Upon Earth.

"Throughout Sunday enormous solid blocks of stone rose to a height of 2,500 feet from the crater, while ashes and sand were thrown much higher, but to-ward Monday the terrible shocks of sand were thrown much higher, but toward Monday the terrible shocks of earthquake gradually diminished. One of the worst features of the eruption was the unusual extent of electrical phenomena, the darkness being broken by vivid flashes of lightning, giving the sky a blood-like color, with short, heavy peals of thunder interspersed. These moments were terrible-very terrible. Yes, it was a veritable hell."

Asked if his scientific observations had yielded valuable results, Professor Matteneric replied:

"Otherwich was much affected. Captain William M. Wright, General Bates, personal aide, has been transferred to the war college in this city.

WHAT WOULD A. A. U. SAY?

observation was extremely difficult observation. The

observation was extremely difficult under such disturbing conditions. The seismic instruments were badly affected by the electrical intensity, each explosion being announced by a violent movement of the instruments, which seemed ready to burst into pieces."

Professor Mattecci sounded a long rasping "R" like a succession of quick taps

Story of the Eruption of Mount Foreigners at Bingham Junction Not Permitted to Interfere.

REMAINED AT POST OF DUTY MAY BE DRIVEN FROM TOWN

Two hundred Greek, Austrian and correspondent today succeeded in reaching the highest point inhabitable on Vesuvius, where Professor Matteucci, di- ham Consolidated Mining and Smelting rector of the royal observatory, has cour- works last night at Bingham Junction. ageously held his post throughout the Sheriff C. Frank Emery quelled the

Sheriff Emery and his deputies scoured the fields and vacant grounds in the neighborhood of the smelters and drove the strikers out of the property. When they gathered in groups they were informed that any attempt at rioting would result in their arrest. This was interpreted to them by Leon Skliris, the Greek employment agent.

shis profession, for he looked like a western cowboy after a hard ride in a dust-storm.

He wore a rough tweed jacket over a woolen shirt, which was held together at the throat by a rough cord. A cloth cap, trousers, leggings and heavy boots completed his costume.

The portico where he stood was kneedeep in ashes, which has been swept aside to make a small footway. From the observatory terrace to which narrow paths had been cut through the ashes the correspondent looked out over an occan of twisted rivers of lava, while Vesurius rose grimly in a mantle of ashes and shouded dark vapor rising like a gisantic fan.

Story of the Scientist.

Professor Matteucel was asked to tell in his own way the story of the cataclysm from the outset. This he readily consented to do, and, speaking in good French, gave the following detailed narractive:

"If first observed Mount Vesuvius giving unusual signs about a month ago, when the lava began to overflow, taking a southwest direction. This gradually increased as several small lava streams formed into one great current.

"The real danger began the middle of last week. Then an enormous stream of lava came from the summit, meeting the other streams which burst from the lower strata. It was this that overwhelmed a Boscotrecase. Throughout the lava discharge the volcano was comparatively quiet and without electrical phenomena or explosions. The only omthous sign was the advancing wave and the cinders of a pine tree over the crater.

Rocks Hurled Skyward.

"Our really terrible period came at 3 o'clock Sunday morning, and lasted until 8 o'clock. The mountain, which hitherto had been silent, suddenly gave out a deafening roar and a great rent was made in its cone. Huge solid rocks were hurled skyward. Some of them fell near the observatory, threatening to crash in the roof; but most of them fell far outlide the observatory zone. There was no coria in this discharge, but solid bull-yed the with their was filled with their lake. Shortly after midnight the strikers dispersed and the town was left quiet. It is not probable that any further trouble grows out of the strike. The strikers demand a raise in wages of 25 cents. George Doucas is the mouth-piece of the strikers and the demand was made about 4 o'clock Friday afternoon. One hundred men struck the first night, and since that time about 100 more have joined them. Superintendent Romney says that the smelter can easily obtain men to put all the furnace. Two furnaces out of five were going full-handed last night, and an effort will be made today to put the other three in operation. The strikers will be put back to work if they want their jobs back, but it is possible that they will leave Bingham and go to Idaho to work on a ditch. At least twenty-five will leave this morning for Idaho, where they have secured employment through agreeing in

GENERAL BATES RETIRES.

Corbin Is Now the Ranking Officer In United States Army.

Washington, April 14.-Lieutenant General John C. Bates was today placed on the retired list of the army, having reached the statutory age. He was succeeded as chief of staff by Brigadier General J. Franklin Bell, but the rank of

Los Angeles, Cal., April 14.—Miss
May Sutton announced today that
she would not go to England to defend her title as the champion woman tennis player of England, on
account of the large expense involved. It is possible that her expenses may be defrayed by public
subscription. in which case Miss
Sutton would probably consent to go.
